

Create new fleet

--MPC has a limit for # of trucks, which is why there're needs to add new fleets
-- for nextier case, once we create the fleet and send fleet guid to support team, and then we will notify Kyle Love<Kyle.Love@NexTierOFS.com> to create correspondent datavan in sale force
-- no further actions required for assetId sync.
--for the naming convention of a fleet, usually our team will be the one to name them unless they have been supplied.
-- for the fleet type, usually the first one is 'Frac Fleet' and the rest are 'Pumper Only'

-- if it is a test stand, we set the fleet type to 'Builder', the naming convention for this case is: fleet 'name' will be 'xxxxx TSY', Y as a incremental number from low to high, 'datavan' as 'MDT_{fleet name}'

BigQuery query to check for existence of trucks (and assetIds) in the NexTier's UDM (keane-prod/udm/asset_master):

```
“
DECLARE latest_date DATE;
SET latest_date = (SELECT MAX(_PARTITIONDATE) FROM udm.asset_master);

SELECT Unit_Number, Asset_Id, Asset_Category FROM udm.asset_master
WHERE _PARTITIONDATE = latest_date
AND Unit_Number LIKE '5111490%’”
```
